## CONSCIOUSNESS DEVELOPMENT AND HYPERTRANSFORMATION AS A BASIC PRINCIPLE OF LIFE, LOVE, AND LEADERSHIP

**Humans are conditioned** seine to neglect their own development and the unfolding of their potential — they underestimate their abilities. Rather, they reduce themselves through fear-driven programming (ego). As a result, undesirable situations that could be significantly improved (self) repeat themselves. The main difference between successful and fulfilled people and others is primarily that they become more self-aware, while others remain more the prisoners to their ego.

**The hybrid processes** for further education with personal depth and concrete application of new insights for accessing higher dimensions, begin where conventional education and coaching/counseling/viewing end: with your self and your individual higher-order programming, which makes you more aware of your life's tasks, challenges, and keys to solutions. From a conscious perspective, not knowing these is symbolic of living your life blindly.

**Access** to the «technology inherent in humans» is understood in a more holistic way, used in a hypertransformative manner for your needs, and human-made technology is viewed in a broader context. Focused on the essentials and with time for guided implementation, the aim is to help you move forward, be prepared, and stay ahead through condensed education. Consciousness development, power multiplication, and hypertransformation are processes initiated by this approach, from which you will benefit far beyond what you have learned.

### Bettina Fischer TheProgressReformer®

As former managing director of an economic newspaper and board delegate for the restructuring of a company, Bettina Fischer has been accompanying courageous and far-sighted personalities from business, politics, society, and science for around 20 years, who spearhead self-/leadership and systemic reformation of the new era through HyperTransformation — achieving holistic success and personal fulfillment. As The Progress Reformer®, Bettina Fischer works where conventional education as well as coaching/consulting/viewing end — and accelerated progress begins. With analytical precision, intuitive-medial depth and foresight, as well as her methods of the future, she guides people to the human self as the source of holistic success, thus going far beyond the achievement of goals.

### IHT HyperTransformation®

Bettina Fischer's concept of HyperTransformation began around 20 years ago when she innovated the HOLOTRANS-System as a CorporateEnergizer® and Personal-Energizer. As a HyperTransformator®, she developed the HYPERTRANS-System. With her former company, the IHT Institut® for HyperTransformation, she intensified her research/development and conducted education courses. The interdisciplinary and holistic approach of IHT HyperTransformation® is based on science, spirituality, phenomenology, and her own international practical experience in progress, transformation, and leadership. Everything begins with the self — its structural and effective levels that have their own programs. Many of these are changeable, but the most important ones are not. We learn about them all step by step.

Steer your life more consciously

Follow your own compass

Love, loving, and being loved

Leadership begins with the self

## Origin, participant feedback, direction

The initial programming plays an important role, as we will learn in the processes. Accordingly, here the story about the origins of this offering: These processes were first carried out in 2011 by the IHT Institute for HyperTransformation, one of Bettina Fischer's former companies, and were integrated into and further developed by her current company, Progress Reformation by Bettina Fischer.

Even back then, the feedback was moving. An excerpt related to the learning aspects was as follows; [current quotes on Bettina Fischer can be found at www.bettinafischer.com](http://www.bettinafischer.com): «Through the process, I consciously examined my programming, recognized the power of consciousness, and internalized the fact that we hold the future in our own minds. It was a fantastic feeling to consciously engage with my self. Today, I perceive my self more consciously, pause more often, can recognize setbacks as opportunities, and, also through letting go, explore new paths. I particularly enjoyed the group, the trusting relationship, and your sensitive, warm-hearted guidance. The processes were enriching in every respect and opened my eyes in many ways. I am convinced that they will continue to have a long-term impact on me...» Head of Communications at a corporation

Unlike in the past, we are now in the midst of geopolitical, economic, and social upheaval. Collectively turbulent years lie ahead. Exponential changes are becoming part of everyday life. Habits must be let go more quickly, and new things must be integrated faster. What awaits you will be more deeply integrated and anticipated in relation to your needs. The kick-off will take place together as group on site, which offers interesting mirrorings and connections. The date for the initial personal session will be defined with every participant individually within +/- one week of the kick-off date.

## Circle of participants

You've achieved a great deal. And yet, there are aspects that are sluggish and/or pressing. The time is ripe for proven, practice-oriented further education, mindful depth, and higher consciousness. You want a reformed guide to becoming a «self-leader», who also applies acquired knowledge more consciously and thus accelerates the creation of more successful realities. You have the foresight to now learn to better utilize your self as an inner economy, to take bold steps — and to further develop your own opinions.
