

## SPEECHES, LECTURES, KEYNOTES

Bettina Fischer offers speeches, lectures, and keynotes for Self-/Leaders to share essential insights and experience on progress reformation, accelerated transformation, and the necessary empowerment – last but not least to make better decisions faster.

### 1. Let's talk

Start the conversation. Share your goals and vision for the event with us. We'll discuss potential themes, delve into the first specifics, and begin crafting a program tailored to your needs..

### 2. Reserve your date

It requires a 50%-deposit to reserve the date of your event in the agenda of Bettina Fischer. Once the contract is signed and we received the confirmation of the deposit initiation, we'll book the pre-event call to discuss the prepared content.

### 3. Abstimmung des Inhalts

With the date set, we dive deeper via (digital) call. This is where we align on content, customize the speech, lecture or keynote – and make sure that the material resonates with your audience. Your feedback is paramount.

### 3. Event-day

The special day arrives. Bettina Fischer will engage and enlighten your audience, drawing on tailored insights and practical perspectives. Expect a memorable session that will inspire the mind, pulsate dialogue, and stimulate to take action.

## EDUCATION AND TRAINING

As an experienced instructor and course director, Bettina Fischer works with program leaders to deliver high-impact education programs/modules on HyperTransformation, ensuring that each program/module meets expectations and delivers real value.

### Background

Three clear signs mirror the new era:

- No technology produced by humans has ever reduced the suffering caused by their ego – with far-reaching consequences. The shift to the self offers the solution and HyperTransformation its accelerated development – of everything.
- Humanity is beginning to understand that it has only developed a fraction of its capabilities, while familiar abilities are being replaced by AI.
- Digital technology will replace much of the human production value, which means that its justification for existence is increasingly based on the development of the human self.

### Foresight

To accelerate the progress of systems in need of reform in society, economy, politics and science, more institutions are needed that offer interdisciplinary and innovative methods of the future. HyperTransformation is one of them.

Bettina Fischer works for participants as well as with the self-/leaders of the institutions.

**Just hypertransform with The State of the Art Self-/Leadership of HyperTransformation.**
